Isabella County, Mich. – **Bandit Industries** has been awarded an additional contract from the **National Joint Powers Alliance** contract for medium-duty and compact construction and maintenance equipment with related attachments, accessories and supplies.

This was awarded in addition to Bandit's existing NJPA contract for landscape and grounds maintenance.

This additional contract gives potential municipal customers an added incentive to purchase Bandit equipment. Buying through NJPA lets them avoid the lengthy and costly request for proposal process, so they can get right to buying the equipment they need.
