

# Training for Hands-On PICP Install in June

Source: [www.TurfMagazine.com](http://www.TurfMagazine.com)

The School for Advanced Segmental Paving (SASP) in Franksville, Wisconsin is offering an educational opportunity: a two day hands-on training course for Mechanical Installation of Permeable Interlocking Concrete Pavement (PICP). The class is June 10th & 11th.

Founded in 2005, The School for Advanced Segmental Paving is the world's first and only full time vocational training facility offering hands-on "best practices" training and education for hardscapes.

Top industry professionals and manufacturer factory reps will be on site, teaching, training and available – answering any questions that students may have during this training course. Curriculum includes: Mechanical Laying & Screeding Training, Best Practices for Site Layout (including training on proportional lasers), Compaction, Screeding.

There are only 20 spots available for this training event. For availability, cost, accommodations or any other information call 952-226-6400 or email [info@paverschool.com](mailto:info@paverschool.com).

The list of equipment being brought in for this SASP training event: Terex articulated wheel loader, compact laying machine, powered sweepers, dual grade laser, hurricane trailered vacuum system, trailered air compressor, hydraulic triple plate compactor, LevelKING loader laser screed, SandMAX large mechanical pull screeds, PaverMAX mechanical laying machine, Typhoon joint cleaner, PUV Paver utility vehicle, UltraSCREED tracked screeder.
